Date Issued: 6/15/2023

Revision Date:

28016

Pork Butt, Boneless, ¼” trim (Prop 12)

Claims:

- None

Description:

- The butt is prepared from the bone in butt.
- All bones, cartilage, and skin are removed.
- Loin side of the butt shall expose the longissimus dorsi (loin eye) muscle equal to or larger than the combined areas of the splenius and semispinales capitis.
- Picnic side shall expose a cross section of the supraspinatilis with no more than a slight enlargement of the tendons.
- Jowl shall be removed by a straight cut, approximately parallel with the loin side, which is not more than 1 inch anterior to the pectorals profundus, measure on the picnic side.
- Large glands and blood clots shall be removed.
- Fat cover measured at the center of the butt shall not exceed 1/4 of an inch.
- Traces of false lean shall be visible.

Packing:

- Butts are packed inside a cryovac bag.
- Placed inside box so as to minimize leakers
- Box is securely closed and double strapped
- Code Date – Packed On: MM/DD/YYYY; on case weight label

Defects:

- Presence of blood clots greater than 1 ½ inches in diameter.
- Fat cover which exceeds 1/4 of an inch in depth.
- Presence of any hard bone.
