

LARGE ANGLE BROOM – B410A

BROOM

TECHNICAL DATA SHEET

1.0 Description

Angle Broom.

Constructed of flagged synthetic fibers and vinyl coated metal handle.

2.0 Intended Use

Is ideal for cleaning hard-to-reach areas, for sweeping dust and debris; excellent to retail stores, foodservice, offices and general purpose.

3.0 Construction

Gray Fiber / Black Handle. The handles are made of metal and coated with black vinyl.

4.0 Packaging and Marking

Packaging:

Each broom comes protected with a poly sleeve.

- 12 handles in an external box

Marking: Use ACS Number: **B410A**

ACS brand or private label is available for this product.

5.0 Directions for Use

- Chose a broom.

Smoother floors can get by with synthetic brooms.

Choose a broom with an angled edge for cleaning under cabinets and in tight spaces.

- Find a Starting Place.

When sweeping a room, there are a couple of different methods. Some people like to walk the perimeter of a room, sweeping from the edges into a pile in the center. Others like to begin at one end of the room and move to the other pulling the dirt pile along with them, or eliminating the pile in sections. Choose a method and starting point that works for you.

- Start Sweeping.

Sweeping isn't a difficult motion to master, but try to keep continuous contact with the floor, without pressing the broom strands down into the floor. Begin on a section of floor away from your body and gently drag the broom towards your body. You can use short quick motions or long sweeping motions. Choose whichever best fits your sweeping style.

-Sweep Up Your Dirt Pile.

Sweep dirt into a pile. Sweep the dirt pile into a dust pan and then deposit it in the trash. Be careful not to dump the dirt too quickly, causing dust and dirt to billow back into your face, or onto your clean floor.

-Put Away Supplies.

Put away all of your supplies and be sure to clean your broom if needed. Hang your broom to prevent the bristles from becoming bent or damaged.

6.0 Properties

Property	Value
Length:	54 " (+/- ½")
Width:	7/8" (+/- 1/16")

7.0 Quick Facts

- The angle broom replaces manual labor and hand brooms, and can clean a small or large area with less effort and in less time.

- The metal handle is more durable than wood handle.

- One main advantage of plastic brooms is they reveal minimal soiling as they are washable.

- The plastic fibers are softer than corn fiber; this allows the broom to be able to sweep very fine dusts.

8.0 Environmental commitment

- ACS is certified in ISO 9001:2015

- Plant is operating under PROFEPA environmental regulations.
