# Can Liner, Lldpe, 43" X 47", 0.9 Mil, Black, 56 Gal

Can Liner, LLDPE, 43" x 47", 0.9 Mil, Black, 56 Gal

The unique Hex Seal bottom provides the load bearing strength to resist puncture and restrict leaks. Liners come in coreless rolls or individually folded. Easier to drop liner in because they conform to the shape of the receptacle. Easier to pull liner out as load weight is distributed more evenly. Most widely produced bottom construction in the commercial liner industry. Small count rolls for ease of distribution. Most widely packaged put up in the commercial industry. Low profile boxes for reduced storage needs. Dispenser boxes enable stacking of multiple sizes in storage closet. Reinforced sidewalls for better shipping (to minimize crushing). High Density liners have heavier load capacity than low density liners; not recommended for sharp, jagged trash. Limited tear strength and stretch. Ideal for breakrooms, restrooms, paper and plastic recycle bins; frequently changed trash.
