PLEASE BE ADVISED

The new 2016 changes to the Nutrition Facts Label by FDA redefined the serving size requirements (among other changes). We have made every effort to provide you with nutrition facts information which complies with the new regulation. However, you must verify the serving size and serving(s) per container for your product -this includes whether the label must use a dual column declaration. You must perform this work because the regulatory requirement varies based upon the package's size.

Ingredients: None Given

Added Sugars: The amount of certain non-digestible oligosaccharides that do not meet the dietary fiber definition and Added Sugars cannot be determined analytically. Therefore, these declarations depend exclusively on information provided by you, the customer. Please note that under the new regulations, the manufacturer is ultimately responsible for these values, and must make and keep records to verify the amount of sugars and dietary fibers, added to their food.
